

# IMPORTANT STANDRULES

## 50% rule

We have experienced exhibitors who have been "hidden" behind a wall, which was placed by the neighbouring exhibitor at the other side of the hall way. Therefore we must emphasize that at least 50 % of the front area against the hall ways must be open.

The fair organizer has the right to remove for example stand build, containers etc. at the exhibitors expense, if the rule is not observed.

## 45 degree rule (see sketch)

Should the stand exceed ordinary building height (250 cm) the 45 degree angle will apply (the hatched area).

Should you have entered into an agreement with the neighbouring stand about exceeding the building height of 250 centimeters, we kindly ask you to send us a copy the agreement in writing, carrying signatures of both parts.

If your stand is a stand with 4 open sides, there are no height limitations.
